Profile

Hello, I am Sungyeon Kim, a mobile app developer with 5 years of experience. I have accumulated rich experience through various projects and place great importance on problem-solving skills and effective communication. I am also open to learning and applying new technologies. In early 2024, I launched Anitoon, an app for creating stop-motion animations. I have also been involved in developing Android apps such as BeatSync and CameraFiLive. Additionally, through the side project Nenio, I have collaborated with planners, designers, and server developers, realizing the importance of teamwork.

Skills

IOS, Android, Swift, Kotlin, Python, Javascript, SwiftUI, Jetpack Compose, Combine, Concurrency, Coroutine, Hilt, Retrofit, MVVM, Composable Architecture, Github, Jira, Figma

Experience

Kinemaster   21.07 ~ / IOS,Android App Developer

- At KineMaster, I was involved in the Anitoon iOS app, BeatSync Android app, and SpeedRamp Android app.
- Anitoon is a Stop Motion Animation app. I gained experience in creating a service by participating from the planning stage of Anitoon.
- I utilized Figma to collaborate with designers and implement various UIs, Mantis for image cropping, created custom UIs for common use, and worked on supporting 18 languages.
- Implemented a service similar to TikTok in BeatSync using Jetpack Compose and GraphQL.
- Developed a feature to share projects created with SpeedRamp to the KineMaster video editing app.

VaultMicro   20.07~21.06 / Android App Developer

- At VaultMicro, I was involved in the CameraFi Live Android app.
- Added a customer support center to CameraFi Live, including implementing the necessary server and admin web interface.

Projects

[Team] Nenio   23.06 ~ / Inroduce

- Nenio is Quick Social Poll App
- Android : Jetpack compose, Hilt, Coroutine, Flow , MVVM , Retrofit
- IOS : Swift, SwiftUI, Composable Architecture
- 100% of the iOS work, 90% of the Android work, and 10% of the server-side work.

[Personal] KakaoSearchBookApp   24.06 / Android / Github Repository

- You can search for books and add them to your favorites using the Kakao Book Search api.
- Compose, Coroutine, Hilt, Room, Paging3, Compose Stable, Flow, Jetpack

[Personal] KSYPhotosIOS   24.07 / iOS / Github Repository

- iPhone basic photo app
- Swift, SwiftUI, Composable Architecture
